It also conducts a Certificate Course in Tally, Python for the employability of the students.

NATIONAL CONFERENCE

Blockchain and AI are the two most emerging technologies. Blockchain is versatile and is easy to apply where AI has surpassed all its limitation of experimenting performances in the lab. Both are embedded with the recent technological, through both have different roots.

Blockchain is considered a shared and permanent ledger that will be used for the encryption of data in the future. AI engine, on the other hand, enables an individual to analyze and make decisions from the collected data. It is worth mentioning that each technology has its multiple complecions, but Artificial Intelligence and blockchain together will provide many benefits.

On the other hand, Cryptocurrency is only on of the many applications of blockchain technology. It is built on a peer-to-peer topology that improves transaction transparency, data resilience, and security while lowering operational cost.

SUB-THEMES:

Data applications in Business
Artificial Intelligence in Marketing
Artificial Intelligence in Fraud Detection and Security
Artificial Intelligence in Sales
Artificial Intelligence in Customer Support
Artificial Intelligence in Product Development
Artificial Intelligence in Human Resources
Artificial Intelligence in Business Operations
AI in Finance and Accounting
Blockchain in Supply chain
Blockchain in Logistics
Blockchain in Retail

These subthemes provide a comprehensive breakdown of the skills and knowledge areas that entrepreneurs need to cultivate for success in today's rapidly changing business environment. Exploring each subtheme in detail during the conference will allow for a more targeted and actionable discussion on skill acquisition for Business Development
